

CONVENIENCE

No more changing high-pressure CO₂ cylinders or running out of CO₂ during peak rush periods.

QUALITY

Uninterrupted CO₂ flow eliminates flat drinks and ensures proper drink calibration.

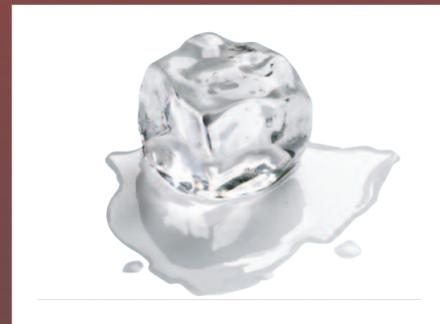

SAFETY

Low operating pressure plus no cylinder handling eliminates job-related injuries.

SAVINGS

Reduces CO₂ use and cost up to 30% with no residual CO₂ returned to supplier.

Chart is the world leader in beverage carbonation systems. For more information on how a Chart Bulk CO₂ System can benefit your operation, call Chart or your local distributor today.

Bulk CO₂ Systems

Innovation. Experience. Performance.®

The Perfect Beverage Carbonation Solution

Chart Bulk CO₂ Systems

1 Meet Your New CO₂ Manager

Nationwide Distributor Network
Chart Bulk CO₂ Systems are supported by a nationwide network of independent companies who have been factory trained to install, fill, maintain and service your system. Each Chart CO₂ distributor acts as your new CO₂ manager by:

- Monitoring your CO₂ use
- Refilling your tank through the outside wall of the store
- Providing a metered receipt for CO₂ delivered

Added Convenience and Savings

Chart Bulk CO₂ Systems eliminate the hassles and costs associated with high-pressure cylinders.

- No more changing high-pressure cylinders during peak rush hours
- Reduce your CO₂ use and cost up to 30%
- CO₂ can be delivered around the clock with no interruptions to store operations
- No more damage to step and floor tiles

2 Stationary Low Pressure System

One bulk CO₂ tank meets the CO₂ requirements for all of your in-house uses. The tank supplies CO₂ continuously and requires no employee handling. It allows personnel to concentrate on serving customers and store operations.

Stationary, Automatic System

- 100% stainless steel
- Permanently installed, requiring no handling or adjustment
- Self-contained, with no electricity required

Maximizes Limited Space

- One bulk CO₂ tank replaces all high-pressure cylinders
- Small footprint takes up less than 3 sq. ft., making room for inventory

Provides A Safer Work Environment

- No cylinder handling eliminates job related injuries
- Low operating pressure eliminates the need for safety chains

3 Improves Drink Quality

Uninterrupted CO₂ Flow

Each Chart Bulk CO₂ System provides an uninterrupted flow of CO₂ which ensures that you will always serve quality drinks. The continuous flow of CO₂:

- Eliminates flat drinks
- Maintains proper drink calibration

Maintains Profit Margins and Eliminates Waste

The Chart Bulk CO₂ System ensures that you will consistently maintain high profit margins generated from fountain beverage sales. It also eliminates the following costs that are associated with running out of CO₂:

- No more wasted cups, lids and straws
- No need to recharge the drink system and waste syrup
- No more unhappy customers with flat drinks or waiting for the CO₂ to be changed

4 CO₂ Monitoring System

Analox

The Analox CO₂ Monitoring System is a precision instrument that provides continuous, accurate monitoring of CO₂ levels to ensure a safe working environment for your employees, suppliers and yourself. A proven system with over 80,000 units installed worldwide. The A50 CO₂ Monitoring System is comprised of:

- One detector (with visual and audible alarms)
- One alarm repeater for remote mounting
- Relay on Alert 1
- 25' plug-in repeater cable (standard networking cable)
- Installation kit
- Two warning signs

Product Advantages

- Relay on Alert 1 - Leak Alert
- Alert 2 - No Entry Alert
- Bright 10 LED visual and loud 80 dB audible alarms
- Detector housing designed to withstand splash environments
- 15 year CO₂ sensor warranty, 2 year electronics warranty
- Plug-in cables for fast and easy installation
- Accessories to customize your installation requirements
- AX60 - same detector as A50, but modular (5 year system warranty)
