

SERVICE BULLETIN

#20533121

DATE: 10/11/2011

MODELS: All Companion Reservoirs

ISSUE: New Contents Indicator Material

NOTES: Effective immediately, all Companion Reservoir contents indicators (C21: B-775845-00, C31: B-775846-00, C41: B-775847-00) will be constructed with a new plastic material for the body, piston and retainer. This change will increase the component's resistance to cleaning and leak detector solutions.

Old Material

New Material

(Figure 1 - - Contents Indicator Material Change)

Old Material

New Material

(Figure 2 - - Contents Indicator blue housing base)

The new plastic material of the body has a light blue tint. This new material will be more resistant to approved cleaners and leak detectors. The approved cleaners and leak detectors are given below:

Function	Acceptable Product
Cleaning	Sporicidin Disinfectant Solution
	Mild dish washing detergent/warm water solution
Disinfecting	Sporicidin Disinfectant Solution
	Household bleach (1:10 dilution with water, freshly made within 24 hours)
Leak Detection	Snoop Liquid Leak Detector

Sporicidin is a registered trademark of: Sporicidin International
 121 Congressional Lane
 Rockville, MD 20802
 Tel: 301-231-7700
www.sporicidin.com

SNOOP is a registered trademark of: Swagelok Co.
 29500 Solon Road
 Solon, OH 44139
 Tel: 440-248-4600
www.swagelok.com

To avoid unnecessary damage to the new contents indicator material when cleaning, ensure the following:

- Do not spray directly onto the Contents Indicator. Spray onto a cloth and apply using a cloth.
- After cleaning, the surface must be rinsed with water

The components made with the new plastic are interchangeable with parts made with the older plastic. This change will not alter the functionality of the contents indicator in any way. The unit will still operate on the concepts of differential pressure and all internal components will be the same. The level sensing integrity will not be decreased by this material change.
