DATE: 5/13/2014

MODEL: CAIRE HELiOS Marathon H850

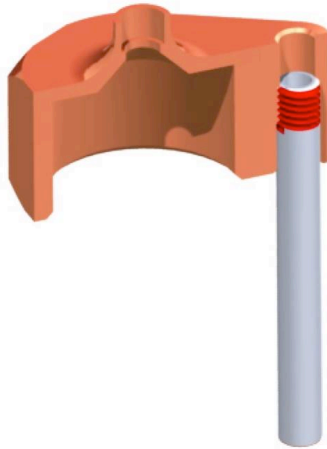

ISSUE: Vent Valve Tube Assembly

NOTES: Effective immediately, the vent valve tube will now have a threaded connection to the QDV adapter as part of rolling changes to the HELiOS Marathon H850. This is a design improvement to the previous pressed-in connection that will make a more secure connection between the vent valve tube and the adapter. This is not a field replaceable component. This change will not affect the performance of the unit in any way.

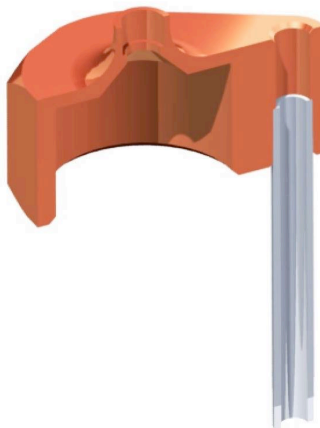

The new part number for this assembly is: 20660433
