Date: June 6, 2016

Document #: DCN-102-MicroBulk Storage Systems

Subject: Perma-Cyl[®] MicroBulk Storage System models have obsoleted the rubber stoppers on the pallet bases (PN 20885670 and 11770158).

Background: In the past, Chart has supplied rubber stoppers for all pallet bases on the Perma-Cyl models. These stoppers are mainly used to retain moisture coming off the vaporization coils for some indoor applications. A majority of Perma-Cyl tank installations are outdoor installations and these stoppers need to be removed in order to ensure that water drains out of the pallet bases. As a result, stoppers will no longer be provided on pallet bases for new tanks being shipped out of Ball Ground, GA.

Products Affected: All Perma-Cyl models that include pallet bases.

Description: If stoppers are needed for a particular installation, they can be ordered using the following part numbers or requested at the time of placing the order:

PN 20885669 - 1 13/16" stoppers used on new lab bases (PC 700-1000)

PN 20885670 - 2 15/32" stoppers used on the new style lab bases (PC 1500 and larger).

PN 11770158 - 1 3/32" stoppers used on the old style lab bases.
