

PDF Logger®

With the PDF Logger®, you require only one single device and no specific software or cables to monitor temperature during the global transfer of cryobiological goods. The incredibly easy-to-use “Transit” and “Arrived” buttons make initiating and receiving monitored shipments fast and simple. The PDF Logger can be plugged into the USB of any PC to automatically generate a PDF evaluation report including statistics, alarm status, and temperature graph which can be read anywhere without difficulty.

With the 1-year lifespan, there are no more hassles of recalibration and recertification. After the datalogger has been in service for 1 year, simply discard the logger and purchase a new one for about the same cost of recalibration and battery replacement. Your PDF Logger is always under warranty!
