C-Flex[™]

Vacuum Insulated Transfer Hoses

Super flexible vacuum insulated liquid nitrogen transfer hoses are used in a wide variety of applications including tool connections and custom OEM applications. The coaxial bellowed construction allows for optimal flexibility. The use of lightweight stainless steel reduces cool-down loss to an absolute minimum. C-Flex hoses are protected by a stainless steel spiral wrap or a braided outer cover.

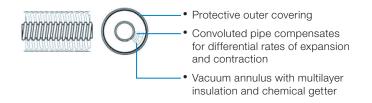

Available in various sizes: 1/4" ID, 3/8" ID, and 1/2" ID stocked in standard lengths for immediate availability.

Features

- Custom Manifolds Available utilize vacuum insulated tees, elbows, bayonets, and valves to custom tailor the configuration (Consult factory)
- High Pressure Requirements optional inner braid for higher pressure applications (Consult factory)
- Pre-evacuated and Sealed Vacuum no pump maintenance to maintain system vacuum
- · Minimal Cool Down & Steady State Losses compared to standard noninsulated transfer hoses
- Integrated pump out

C-Flex™

Key Benefits

- Minimize Safety Issues eliminate many of the hazards associated with non-insulated hoses
- Easy Installation & Modifications bendable, lightweight, and its plug and play approach facilitates easy installation and allows for on-site layout changes
- Future Expansion any bayonet joint can accommodate expansion due to its bendable nature
