

AVOID THE MOST **UNPROFITABLE SIGN** IN THE BUSINESS...USE BULK CO₂

In today's busy food service operation, you don't always have the time or manpower to change high-pressure cylinders when you run out of CO₂. When your fountain systems go down and the **OUT OF ORDER** sign goes up, high margin profits disappear.

There is an affordable solution — the Chart Eco₂Mizer® bulk CO₂ system. The Eco₂Mizer tank is a low-pressure, permanently installed bulk CO₂ system that is connected to an outside wall box. Your bulk CO₂ supplier routinely tops off your tank — eliminating CO₂ outages so you can focus on customer sales at lunch rush rather than gas inventory.

The Chart Eco₂Mizer System vs. HP Cylinders

Eco₂Mizer
Indoor or
Outdoor Bulk
CO₂ Install

Indoor High Pressure
CO₂ Cylinder Install

Eco₂Mizer Benefits:

- Designed to displace HP cylinders in accounts using about 20 - 50 lb per month
- Can sit idle for short & extended periods.
- Same size / capacity as a current Carbo-Mizer® 550 Bulk CO₂
- 7-year vacuum warranty
- 2-year warranty on parts
- Fill once per year (depending on actual consumption)
 - Ideal for applications using 1.5lbs/day or less (Roughly 130-150 16oz Beverages)
- Pay a flat monthly service fee vs. monthly cylinder rental plus gas use
- Eliminates cylinder handling and change outs at small restaurants and coffee shops
- Eliminates lost cylinders and loss of use reconciliation/ charges
- Eliminates the safety risk of storing and moving high pressure cylinders inside relatively small spaces
- Proudly made in the USA, as are all Chart beverage system tanks
