ASB-2: LN₂ Supply_Cryosauna_JUKA Equipment

Solving Equipment Challenges for the Application

Understanding the application requirements and setting up the cryogenic equipment controls are critical for a successful system operation. Requirements for the JUKA Brand are:

Brand	Min Pressure	Max Pressure	Ideal Ops Pressure		
		(Back Press Set)	(PB Set)	Valve Set*	
JUKA	45 psi	60 psi	50 psi	75 psi	2 lpm**

^{*} Do Not Isolate RV.

LN₂ Supply New Cryosauna Portable Solution

New Cylinders /JUKA Complete (Includes PB Regulator Kit, Over-Pressure Regulator Kit, 75 psi Relief Valve, 0-100 psi pressure gauge, and Roto-Tel™ Liquid Level Gauge)						
P/N	Description					
20932441	FNL DURA-CYL 230LP SB TC / JUKA PLUMBING COMPLETE					
20931820	FNL DURA-CYL 230MP SB MCR TC / JUKA PLUMBING COMPLETE					
20931821	FNL DURA-CYL 230HP SB MCR TC / JUKA PLUMBING COMPLETE					

LN₂ Supply Retrofit Kit for Cryosauna Portable Solution

JUKA – Field Retrofit Existing Liquid Cylinders					
P/N	Description				
20931818	KIT LP PB AND OVER-PRESSURE JUKA (USED CYLINDER W/O PB KIT)(1)				
20931819	KIT MP/HP PB AND OVER-PRESSURE JUKA (USED CYLINDER)(1)(2)				
20931813	C-STIC COMPLETE SGB-2 BOX/CAP PROBE 230L (NEW CYLINDERS)(3)(4)				
20938809	C-STIC COMPLETE SGB-2 BOX/CAP PROBE 230L (RETROFIT USED CYLINDERS) ⁽⁴⁾				
20931814	C-STIC COMPLETE VGB-2 BOX/CAP PROBE 230L (ALARMS)(NEW CYLINDERS)(3)(4)				
20938810	C-STIC COMPLETE VGB-2 BOX/CAP PROBE 230L (ALARMS)(RETROFIT USED CYLINDERS)(4)				
9710379	MUFFLER INERT SERVICE (AVAILABLE AT WWW.CHARTPARTS.COM)				
13947885	OXYGEN MONITOR (AVAILABLE AT WWW.CHARTPARTS.COM)				

⁽¹⁾ The retrofit kits are only applicable to Dura-Cyl® 230 liter models. Please consult Chart for other models.

1.800.400.4683 - Dura-Cyl®, Perma-Cyl®, Bulk, BulkLite® 1400 1.888.877.3093 - Vacuum Insulated Pipe

^{**2} liters per minute

⁽²⁾ The MP/HP kit includes PB Regulator Kit, Over-Pressure Regulator Kit, 75 psi Relief Valve, 0-100 psi pressure gauge, Dura-Cyl® 230LP Product Label, and Yellow Roto-Tel™ Protector.

 $^{^{(3)}}$ The Roto-TelTM is a mechanical gauge standard on new Dura-Cyl[®] liquid cylinders. With an upgrade to a Rotarex C-Stic digital gauge, a credit of \$50.00 will be offered for the removal of the Roto-TelTM and given toward the Rotorex C-Stic price. (4) C-Stic part numbers will only work for Dura-Cyl® 230L cylinders built since mid 2008. Please consult Chart for other models.

ASB-2: LN₂ Supply_Cryosauna_JUKA Equipment

LN₂ Supply New Cryosauna Stationary Solution

Perma-Cyl® JUKA Cryosauna Ready Requirements – Option #04 LP Liquid w/ ½ " VJ Withdrawal							
Description	Purpose						
Models: 1000HP, 1500HP, 2000HP, 3000HP	With ½" VJ Female Bayonet & Valve.	ZI COL					
Backpressure Regulator, set 60 psi	To control the top end pressure. Need ½" size to prevent pressure spike at filling.						
Pressure Builder Regulator, set 50 psi	To control bottom end pressure.						

C-Flex VIP Transfer Hoses for Cryosauna LN₂ Installations

Perma-Cyl® Vacuum Insulated Pipe (VIP) Flex

3/8" C-Flex Spiral Outer Hose - 1/2" Female Flare (CGA LN₂) x 1/2" Male Bayonet (fits to Perma-Cyl® VJ Option)

Special requirement: with integrated 100 psig atmospheric relief valve at bayonet end.

Smart Number	Description	ID [in]	OD [in]	Length [ft]	End Ftg 1	End Ftg 2	Pressure Rating
0604S-8SE-MVE2-WRV	Perma-Cyl Ready 4FB	3/8"	1-1/2"	4	1/2" SAE 45 F Fl	MVE 1/2" Male Bayonet	150 PSI
0606S-8SE-MVE2-WRV	Perma-Cyl Ready 6FB	3/8"	1-1/2"	6	1/2" SAE 45 F Fl	MVE 1/2" Male Bayonet	150 PSI
0608S-8SE-MVE2-WRV	Perma-Cyl Ready 8FB	3/8"	1-1/2"	8	1/2" SAE 45 F Fl	MVE 1/2" Male Bayonet	150 PSI
0610S-8SE-MVE2-WRV	Perma-Cyl Ready 10FB	3/8"	1-1/2"	10	1/2" SAE 45 F Fl	MVE 1/2" Male Bayonet	150 PSI
0612S-8SE-MVE2-WRV	Perma-Cyl Ready 12FB	3/8"	1-1/2"	12	1/2" SAE 45 F Fl	MVE 1/2" Male Bayonet	150 PSI
0614S-8SE-MVE2-WRV	Perma-Cyl Ready 14FB	3/8"	1-1/2"	14	1/2" SAE 45 F Fl	MVE 1/2" Male Bayonet	150 PSI
0616S-8SE-MVE2-WRV	Perma-Cyl Ready 16FB	3/8"	1-1/2"	16	1/2" SAE 45 F Fl	MVE 1/2" Male Bayonet	150 PSI
0618S-8SE-MVE2-WRV	Perma-Cyl Ready 18FB	3/8"	1-1/2"	18	1/2" SAE 45 F Fl	MVE 1/2" Male Bayonet	150 PSI
0620S-8SE-MVE2-WRV	Perma-Cyl Ready 20FB	3/8"	1-1/2"	20	1/2" SAE 45 F Fl	MVE 1/2" Male Bayonet	150 PSI

Dura-Cyl® Vacuum Insulated Pipe (VIP) Flex

3/8" C-Flex Spiral Outer Hose - 1/2" Female Flare (CGA LN₂) x 1/2" Female Flare (fits to Liquid Cylinder - Liquid Connection)

Special requirement: with integrated 100 psig atmospheric relief valve.

Smart Number	Description	ID [in]	OD [in]	Length [ft]	End Ftg 1	End Ftg 2	Pressure Rating
0604S-8SE-8SE-WRV	Dura-Cyl Ready 4FF	3/8"	1-1/2"	4	1/2" SAE 45 F Fl	1/2" SAE 45 F Fl	150 PSI
0606S-8SE-8SE-WRV	Dura-Cyl Ready 6FF	3/8"	1-1/2"	6	1/2" SAE 45 F FI	1/2" SAE 45 F Fl	150 PSI

0620S-8SE-8SE-WRV	Dura-Cyl Ready 20FF	3/8"	1-1/2"	20	1⁄2" SAE 45 F Fl	1/2" SAE 45 F FI	150 PSI

^{*} For all piping installations, Chart recommends flex or rigid VIP/VIT. Consult factory for rigid VIP/VIT solutions.

LIQUID CYLINDER EXCHANGE PROCEDURE FOR CRYOSAUNA UNITS WITH LIQUID NITROGEN (LN₂)

JUKA Cryosaunas

To Remove Empty Dura-Cyl®

- 1. Put on face shield.
- 2. Put on gloves.
- 3. Close <u>BLUE</u> handled liquid valve all the way (clockwise).
- 4. Immediately operate Cryosauna "cool down cycle" to release pressure in hose. Run for at least 30 seconds.
- 5. With the proper size wrench, remove flare fitting connection at the <u>BLUE</u> handled liquid valve and hose (counter-clockwise). BE AWARE THAT SOME LIQUID MAY RELEASE AT THE CONNECTION. If continuous, go back to step 3.

Note: Isolation valve at Cryosauna is normally open at all times.

To Install Full Dura-Cyl®

- 1. Put on face shield.
- 2. Put on gloves.
- 3. With the proper size wrench, install flare fitting connection at <u>BLUE</u> handled liquid valve and hose (clockwise).
- 4. Confirm Cryosauna is in "off" mode, including "cool down cycle".
- 5. Inspect Dura-Cyl® for proper pressure (max pressure from 60 to 65 psi*) on pressure gauge.
- 6. Inspect Dura-Cyl® for proper liquid level contents.
- 7. Turn <u>GREEN</u> handled pressure builder valve counter-clockwise to confirm it is in open position.
- 8. Open <u>BLUE</u> handled liquid valve (counter-clockwise), all the way to supply LN₂ to the Cryosauna.
- 9. Inspect for leaks at hose to tank connection & tighten if necessary.

*If the pressure is higher than 65 psi, the over-pressure regulator should be adjusted down until the pressure is between 60 and 65 psi.
