

As Chart continues to provide our distributors with the best products and services in the industry, we would like to be sure you take advantage of our ThermaCalc Cloud software tool.

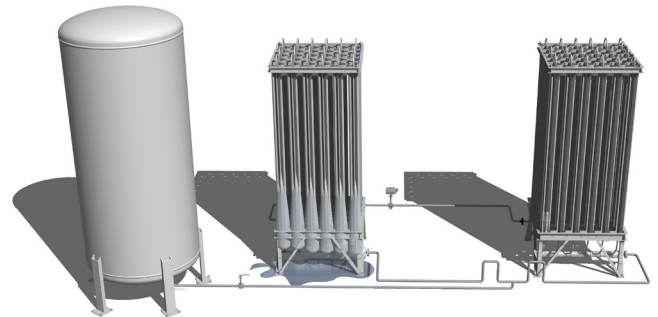

Software Highlights:

- ✓ Size your ambient air vaporizers
- ✓ Calculate the ambient air vaporizer performance
- ✓ Pressure build application guide
- ✓ Trim heater application guide

Freeze periods are tricky and greatly effect the size and number of vaporizers. Get it right every time with **ThermaCalc!**

Parameters (change)		Results	
Fluid	Nitrogen	Resolved Location	450 N Roxbury Dr #600, Beverly Hills, CA 90210, USA
Inlet Pressure	600 PSIG	Elevation	262 FT ASL
Flow Rate	10000 SCFH	Freezing Period	0.1 weeks (zone 10b)
Duration	24 hours for 7 days per week	Approach Temperature	20 °F
Site Location	90210	Est. Pressure Drop	1.20 PSI
		Est. Outlet Pressure	598.80 PSIG
