

# Chart Leasing

Leasing solutions  
to suit your business

# Maximizing Your Flexibility

Reduce capex by spreading your investment by up to 10 years with a finance lease.

Chart provides single source accountability and full lifecycle service including:

- Managing logistics
- Document retention
- Invoicing
- Strategically located facilities across Europe
- Field service and preventative maintenance
- Dedicated account manager and access to commercial team

# Lease to Own

01

Available on most equipment Chart builds, including cryogenic, rotating, heat transfer, water treatment and carbon capture.

02

Cost-effective alternative to outright purchases.

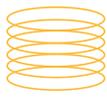

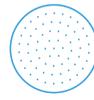

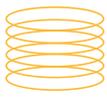

03

Conservation of capital, added flexibility, lower upfront investment, accelerated timescales.

# Conditions

- Chart finances the sale of the equipment with a €1 buyout at the end of the lease
- CAPEX solutions with full ownership at the end of the lease period
- Spread your investment between 1 and 10 years
- Option to purchase the equipment at any time
- Down payment + fixed monthly payments

## Rental

Respond quickly to seasonal or sudden increases in demand or replace equipment while yours is being repaired or serviced.

Chart has an expanding equipment fleet available for immediate rental:

- Semi-trailers for air gases, carbon dioxide and LNG
- Liquid gas cylinders (Euro-Cyl range)
- Microfueler for LIN, LOX, LAR and CO<sub>2</sub>

For longer term operating leases Chart can provide equipment tailored to your specifications. Details on application.

- Short, medium and long term options available from 1 month to 10 years
- No deposit required
- Chart maintains ownership throughout the lease
- Insurance and aftermarket services can be added to lease terms
- 3 year minimum term on new build equipment
