

# Design Change Notification

**Date:** March 17, 2017

**Document #:** DCN-109-LN<sub>2</sub> Dosing Systems

**Subject:** Legacy Support Termination.  
As of March 1, 2017 the Siemens S7200 Controller can no longer be purchased. Siemens has ceased to manufacture this HMI, thus Chart can no longer support replacement requests.

**Background:** Chart Inc. recently sold the last two remaining replacement controllers being held in legacy support inventory. While there is more than one reason for this support coming to an end, the main reason is availability. Chart Inc. will continue to support you with software issues and functionality concerns.

**Products Affected:** The dosing systems that were sold with the S7200 controllers include: CryoDoser and UltraDoser models.

**Description:** The S7200 controller production was ended by Siemens in 2012/2013. Chart has continued to support this controller through March 1, 2017 for our distributors and customers. The 2KS and 2KA controllers replaced the S7200 and AB1500 controllers respectively. If a new S7200 is required moving forward, Chart recommends upgrading to the 2KS controller. The part number for that upgrade is 15205.

Legacy PN	Legacy Description	Replacement PN	Replacement Description
2820	Siemens S7200 Controller	15205	2KS Controller

**Contact:** If you have questions or concerns relative to this action, please contact your Chart Customer Service Representative at (800) 371-3303. Thank you for depending on Chart to provide high product quality and service.
