- High speed balancing
- On-site condition and performance check
- Emergency support
- Remote technical support
- Training
- Howden Uptime online monitoring
- Service agreements
- Cryogenic repairs
- Cryogenic Servicing
- Calibration

## Italian based service partner focused on lifecycle solutions for Howden's rotating equipment and Chart's cryogenic product portfolio.

### Local coverage

Local expertise, experience and service and entry point to a global organisation covering a wide range of industries and products. Our aim being to provide you with a regional partner focused on providing flexible solutions to solve your most challenging needs.

### Maintenance & repairs

Our maintenance philosophy is based on minimising the total cost of ownership by determining the most efficient balance between availability and reliability.

We safeguard reliability by fully investigating any failures that occur, and preventing their recurrence. Our engineering experience and the feedback we receive allows us to continually improve our maintenance strategies and plans, which have evolved into a comprehensive and flexible modular system designed to actively optimise your equipment and process performance.

### Spare parts

All spare parts are manufactured to the highest quality specifications and original criteria.

- Automated stock replenishment
- Consumption based invoicing
- Most despatches made within 24 hours
- Secure e-commerce portal

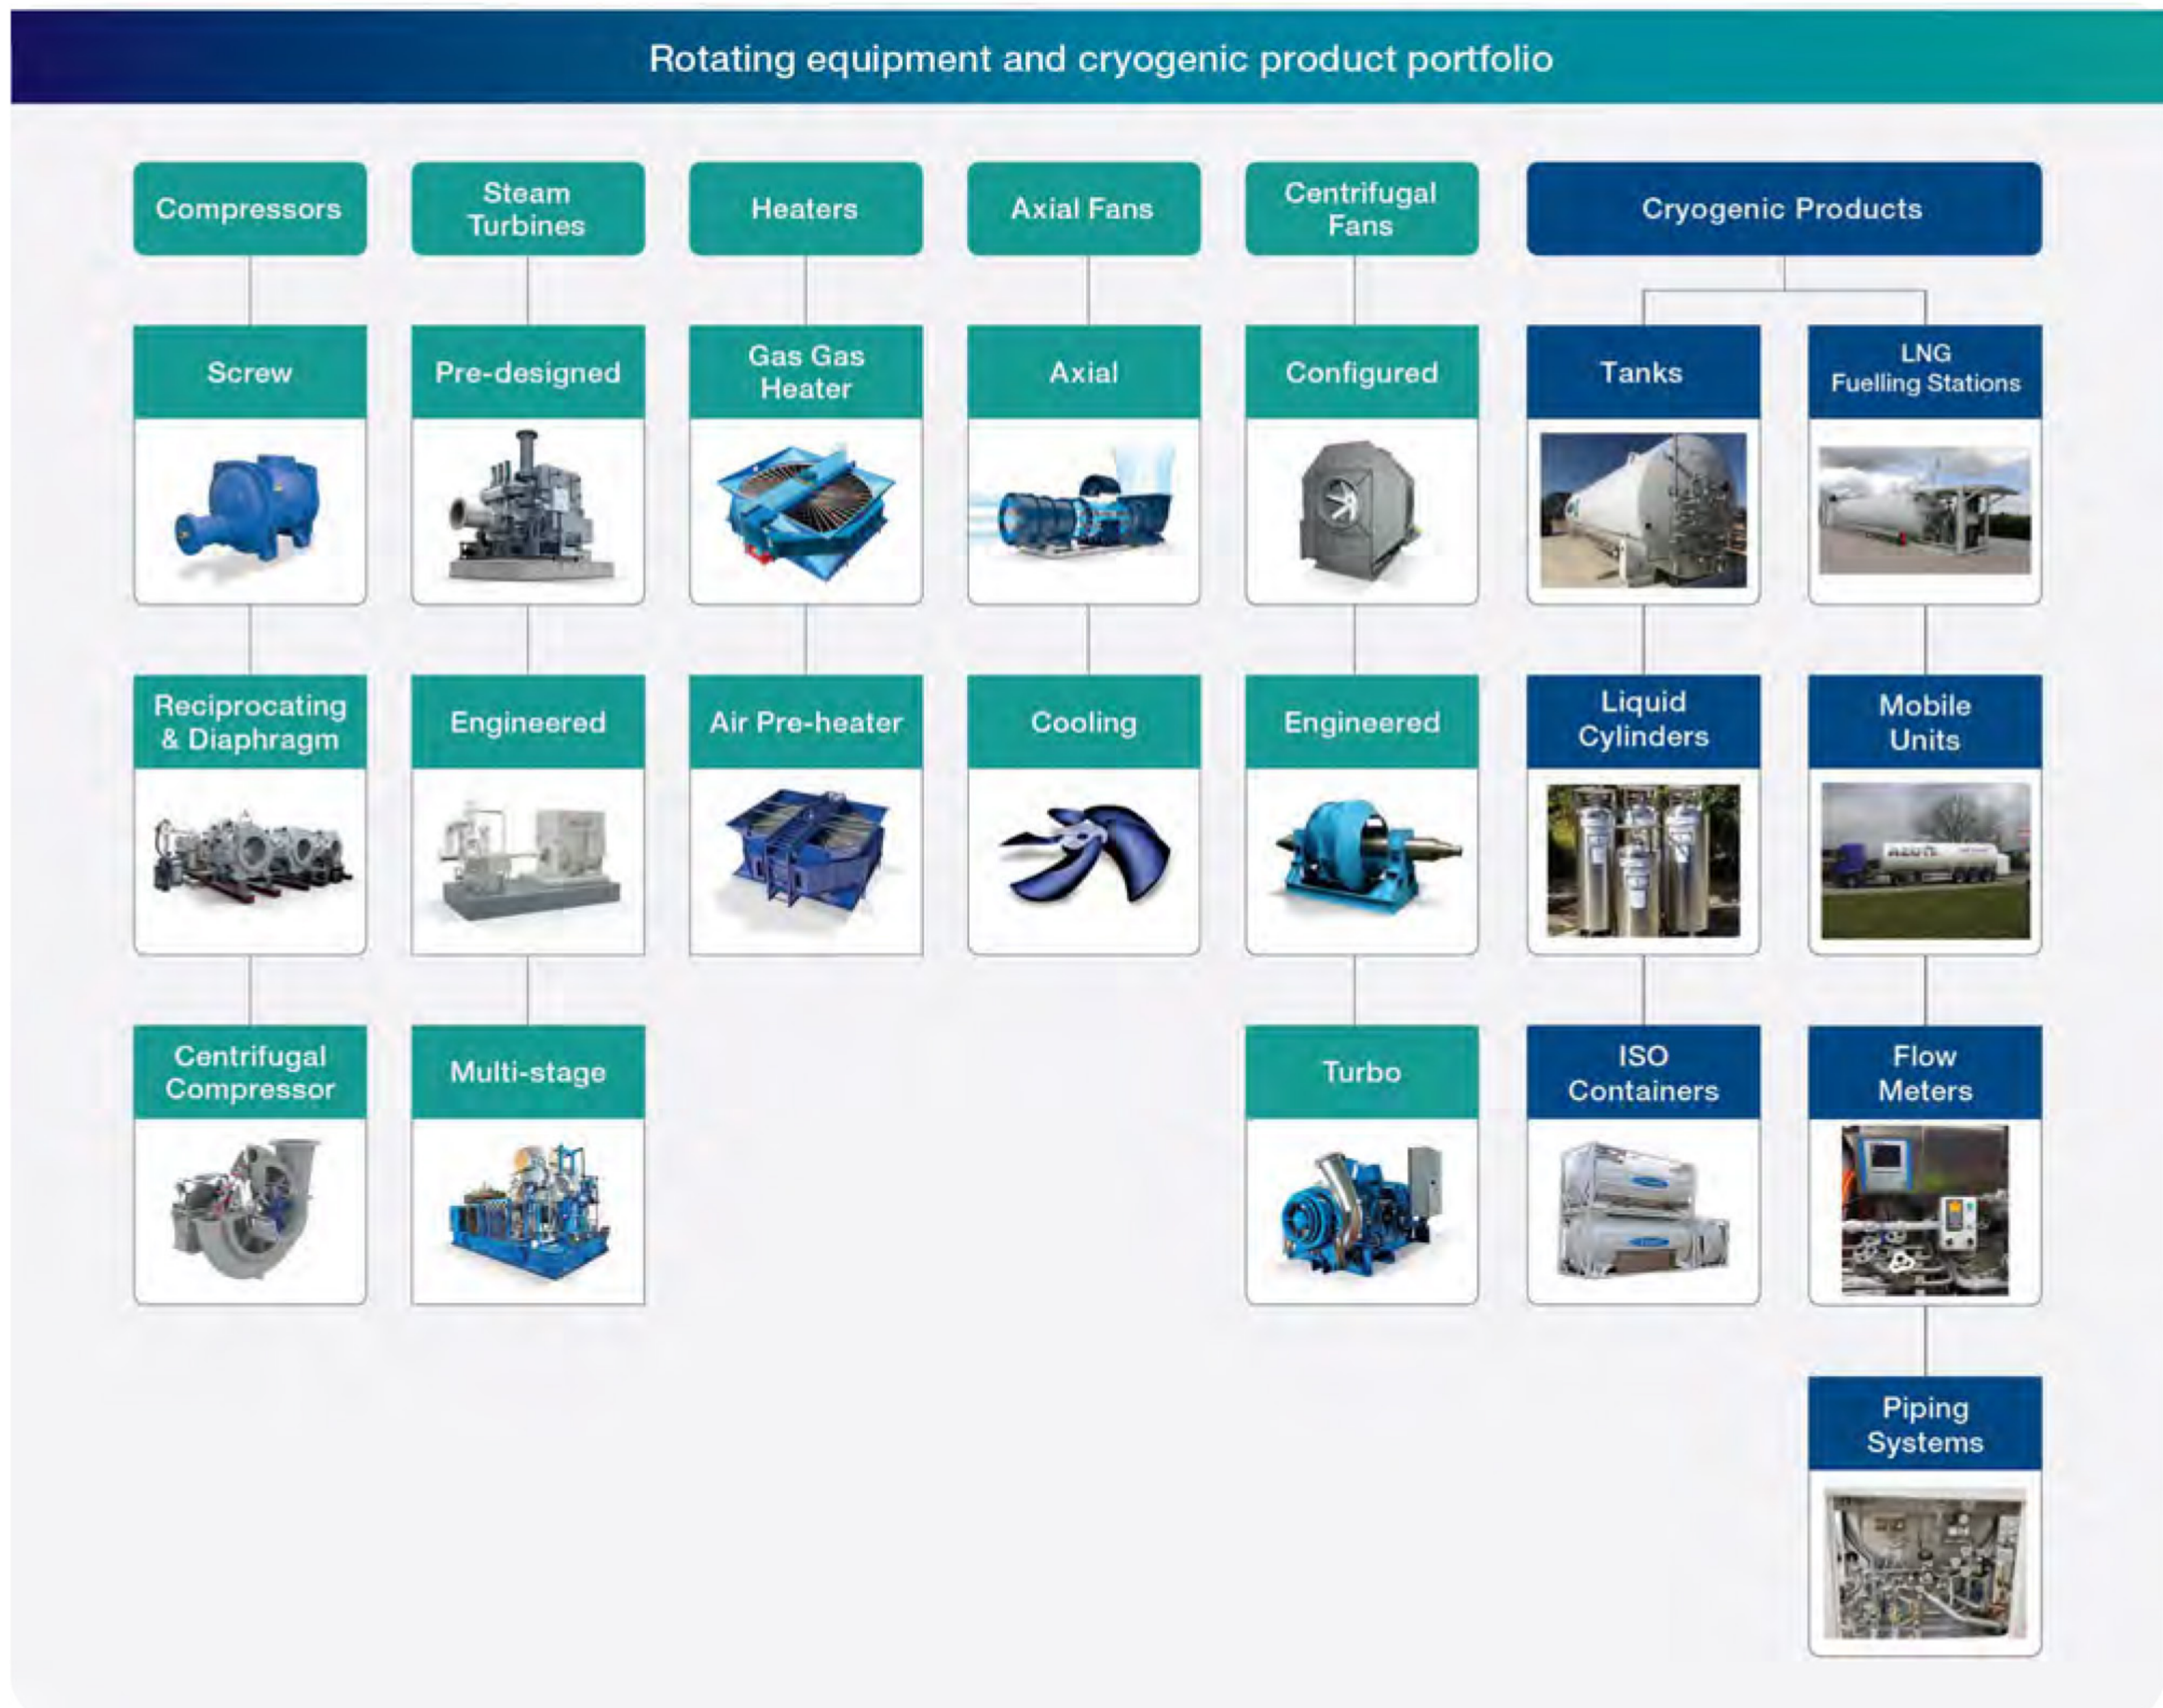

### Digital solutions

Combining Chart and Howden engineering expertise with the latest digital technologies reduces your risk of unplanned downtime, improves operational efficiency, equipment life cycle, performance and safety.

We enable our customers' successes in critical processes across a broad range of markets, including: infrastructure, industrial, power, energy & renewables.

### Compressor Service

With >30 years direct experience, Howden Italy is a specialist in the full suite of compressor aftermarket repair, servicing and commissioning functions.

- Work can be carried out in our fully equipped workshop or at your site
- Rotor and shaft balancing
- Software and technicians for manufacturing and testing local and main control panels
- Customer witnessed factory acceptance tests

### Cryogenic Repairs & Refurbishment

Serving the complete range of Chart cryogenic storage and distribution products including bulk tanks, liquid cylinders (MicroBulk), ISO containers, tank trailers, other mobile units, piping systems and valves.

- All repairs and refurbishments carried out in accordance with recognized international accreditations and fully warranted
- As new condition includes full mass-spectrometer vacuum leak check, pressure test, renewal of piping systems, valves and painting
- Calibration of Flow Instruments GmbH products
