

MANIFOLDS

CPI's precise manifold bars are used to create a more efficient lubrication system.

The wide range of high quality suction and discharge manifold kits offered by

CPI, part of the Howden group, can be configured to fit any application.

The improved manifold bars are capable of handling operating pressure up to 8,000 psi. Discharge manifold bars combine the oil output of two or more pumps and allow for installation of accessories such as a pressure gauge and a pressure relief device. Each discharge manifold bar and fittings in the kit feature CPI 1/8" ORB threaded connections, which utilize an O-ring seal instead of the traditional tapered thread seal, to eliminate leakage past the threads. Suction manifold bars diverge a single oil supply to two or more pumps. Each suction manifold bar features SAE-6 inlet ports and CPI 1/8" ORB outlet ports.

FEATURES

- Anodized 7075 -T651/T7351 aluminum bars
- 316 stainless steel fittings
- Glycerin filled pressure gauge with dual units (psi/bar)
- · Pressure gauge with tube stem mount eliminates the need for sealant, eliminates leaks, and allows easy field positioning for optimal viewing of the gauge
- CPI 1/8" ORB and SAE-6 ports eliminate the need for sealant
- CPI 1/8" ORB port is compatible with standard 1/8" NPT fittings for field service if required
- · Manifold kits provide flexibility to assemble the manifold in different orientations to fit various applications
- Kits are available with a rupture disc assembly or POPR® pop open pressure relief valve assembly as a hydraulic pressure relief device

Suction Manifolds & Kits

All manifold bars and fittings in the kit feature CPI 1/8" ORB ports and SAE-6 ports

PART NO.	PART TYPE	DESCRIPTION

CPI, part of the Howden group, is an industry-leading manufacturer of precision-engineered components for reciprocating compressors used in petrochemical, refining, natural gas, and offshore industries. The CPI product range includes packing, piston and rider rings, and a complete line of compressor valves designed to provide each customer with maximum performance and reliability for their application. In addition, CPI offers the highest quality lubrication system technology for further compressor efficiency and protection.
