Our Mission
BlueInGreen empowers water treatment professionals to make a difference by making water treatment processes more efficient, more effective, safer and more environmentally sound.

Our Method
With over 100 installations in North America treating over 7.5 billion combined liters of water each day, BIG offers the most efficient, cost-effective solutions for oxygenation, pH adjustment, oxidation and odor control.

Our Solutions
Since 2004, we have expanded our offerings into two product lines: the Core Series, the ultimate in precision and control, and StreamLine, a more simplified solution. Each unit is custom-engineered to meet your needs.

Our Pairing
The combination of Chart equipment and BIG technology delivers an end-to-end solution that consumes up to 40% less gas than other alternatives for the same level of treatment while featuring the smallest energy, carbon and physical footprint available.

Our Reach
BlueInGreen is proud to be part of the Chart family of brands. We are backed by 3,800 employees globally, serving customers on 6 continents from key locations across the Americas, Europe and Asia. We are here for you, no matter where you are.

SDOX-CS® Core Series
Greater control and precision with a lower life-cycle cost.
Combat odor and corrosion problems in your wastewater treatment operations and municipal collection system with the SDOX-CS®. Designed to eliminate sulfide production by promoting an aerobic environment, the SDOX-CS® offers a proven alternative to chemical treatment in basins, lagoons and municipal forcemain and gravity sewers.

StreamLineO2
Industry-leading efficiency at a lower upfront cost.
The StreamLineO2 offers highly efficient, highly effective odor control at a lower capital cost than conventional equipment while also offering the same stellar support and service as BlueInGreen's Core Series. Because sometimes less is more.

Applications
- Chemical Replacement
- Dissolved Sulfide Removal
- Corrosion Control
- \( H_2S \) Reduction

Benefits Up To
- 98% Gas-Transfer Efficiency
- 30% Annual Cost Savings
- 100% Elimination of Chemicals
- 20% Reduction of BOD
**Bubble Control**

Our patented technology dissolves oxygen at the molecular level, eliminating bubbles altogether - keeping gas in the water and money in your pocket.

---

**Reduce or Eliminate Basins**

Don’t build a basin if you don’t have to. Conventional technologies often need large concrete basins, which require significant civil work. Our technology can eliminate the need for unnecessary construction, further reducing costs.

---

**End Chemical Dependency**

Stop wasting money on chemicals, and start saving with dissolved oxygen. Compared to conventional odor treatment, our solutions can save 50% or more in annual operating costs by eliminating expensive chemicals.

---

**Single-Source Responsibility**

A Chart Industries Company, BIG offers an end-to-end solution, providing gas storage, vaporization and dissolution equipment with single-source responsibility.

---

**Lowest Cost**

Wasting money stinks, but your wastewater doesn’t have to. With a smaller footprint and flow rate, BIG provides savings on installation. Plus, the system’s power turndown reduces your overall operational costs each and every day.

---

**Start to Finish**

We can assist in all stages of the project process: designing, testing, training, start-up and even providing O&M and aftermarket needs throughout the life of your product. Our team is here to help you every step of the way.

---

**Proud Partnership**

Paring BIG dissolution systems with vacuum-insulated storage tanks and vaporizers manufactured by Chart Industries means a longer product lifecycle and more efficient use of gas and energy.

---

**WWT Systems, Forcemain or Gravity Sewers**

BIG goes with the flow. Whether your odor problems exist within a wastewater treatment system, gravity line or inside a forcemain system, our solutions can be designed to provide sufficient oxygen to minimize sulfide formation.

---

**Quality Guaranteed**

We stand behind our technology. Every unit is factory-tested by our expert team of technicians and engineers at our U.S. manufacturing facility to ensure your equipment works both before and after it’s installed.

---

**Breathe Easily**

Our technology is a breath of fresh air. While many competitors only mask or absorb hydrogen sulfide, BIG prevents odor and corrosion-causing gases altogether. They treat the symptom. We solve the problem.

---
