**Thermax Electric Water Bath Vaporizers**

use electrically heated water as the heat source to vaporizer and superheat cryogenic fluids. The units ship completely factory assembled and are wired for easy installation. Standard models are available up to 2,000kW. The units include a vaporizer tube bundle, a tank for water or anti-freeze solution, electric immersion heaters, and complete controls for maintaining bath temperature.

The vaporizer bundle features Thermax In-Tube Vortex Generators to increase heat transfer and minimize pressure surges. The water ballast provides a large thermal mass that reduces both peak power demand and thermal stress, extending the life of the tube bundle.

Call for other cryogen ratings.

**Options**

- Multiple vaporizing bundles in one tank
- Anti-stratification water circulators
- Automatic water-fill solenoid valve and control
- Custom controls designed specifically for your application
- Digital temperature controllers
- Explosion proof units up to 1,500 kW
- 240V, 600V or custom voltages
- Low temp shutdown valve and controller
- Stainless Steel shell
- SCR power control for stepless, proportional power
- Tank Insulation
- Oversized tanks for custom ballast times

**Standard features**

- ASME Sect VIII Div. 1 code stamp on bundle
- Carbon steel water tank, 3 minute horizontal ballast
- Flanged type immersion heaters, 480VAC, removable without draining tank
- NEMA rated panel and power controls
- Water Bath Temperature gauge
- Sight glass for water level indication
- Stainless Steel removable tube bundle with Thermax
- In-Tube Vortex Generator.
- Low water safety cutout and alarm light
- Automatic digital temperature control of water bath
